Binary Code License The Binary Code License is a GNU GPL version 2 license which means you can use the programs in binary (non-source) form, without having to place the source code in the public domain. Java SE 8 Java SE 8 is available for download in Linux, Microsoft Windows, Solaris and Mac OS X. Java SE 8 is Java platform, Standard Edition version 8. While Java SE is the "official" name of Java, it is often used to refer to the Java Platform in general. Java SE 8 can be downloaded as a single file.jar, or as a.tgz archive. A.jar file can be unpacked to produce a single.class file. Java SE 8 uses UTF-8 for source code and binary interchange and is supported by JDK and JRE. Java SE 8 is full of goodness, as you might expect. It comes with: Java SE 8 supports the Java SE APIs (platform toolkit), a number of new features and enhancements to the Java SE Platform APIs and a number of new APIs. Java SE 8 uses a modified JVM, called the Java HotSpot VM, which is used as the

virtual machine component of the JVM. The Java HotSpot VM has been enhanced with new features like live debugging, speculative execution, optimizations such as Garbage Collection, thread support and data sharing. Java SE 8 comes with a number of enhancements and changes: The Java Tool Chain has been improved. JDK and JRE are now available as bundles. This allows a new user to install the JDK and JRE directly from the latest versions from Sun. The Java WebStart has been removed from the Java SE 8 JARs. Java WebStart was only available as part of the Java SE 6 version. Java WebStart is now a separate download (Java SE 6 was called Java Platform 6). The Java Plug-in is no longer bundled with the JDK. Java SE 8 also includes a new installation mechanism called the WebStart Manager. The WebStart Manager is used for the installation of third-party Java applets from the web. The Java Debugger has been improved. Java SE 8 now provides the Java Debug Monitor, a graphical user interface (GUI) for the Java Debug Monitor (JMON). The JDK 8 and JRE 8 release notes provide more details and additional information. Java 8 is fully compatible with Java SE 7. The source and binary compatibility and binary extensions
